How much can I Borrow?

You decide how much money you borrow with a Trade Apprentice Support Loan. You could borrow just a small amount over a few months or receive payment over the four years of your apprenticeship, up to **the lifetime limit of $25,643 (2024-2025) (2023-24).** For further information go to www.australianapprenticeships.gov.au/aus-apprenticeships-incentives

TOOLS FOR LIFE APPRENTICE SUPPORT LOANS

You may be eligible to apply for an Australian Government funded "Trade Apprentice Support Loan"

To support Australian Apprentices to meet everyday costs while they undertake their training, eligible apprentices will be able to apply for an Apprentice Support Loan. These loans provide up to $25,643 (2024–2025) (2023–24) worth of income contingent loans and are paid monthly in arrears. Apprentices will not have to repay the loans until they are earning an income above the minimum repayment threshold. In order to maintain the real value of the loans, the loan amount will be indexed according to the Consumer Price Index.
* Apprentices who successfully complete their apprenticeship will receive a 20% discount on their loan amount. For further information go to www.australianapprenticeships.gov.au/aus-apprenticeships-incentives

LOK·ON Sockets

85% ROUNDED

LOK-ON™ Sockets are designed to loosen up-to 85% rounded and damaged fasteners whilst offering higher torque capacity and reducing stress concentration. The patented LOK-ON™ design a subtle cam integrated with the LOK-ON™ grooves which prevent further rounding of fasteners and also includes a knurled finger grip for speed on loose fasteners.

LOK·ON 40CRV2

40 CrV2 INDUSTRIAL GRADE

Chrome Vanadium is a composite of many metallic elements and not all CrV products are created equal. 40CrV2 is an industrial grade material superior in strength to standard professional grade variants. All LOK-ON™ sockets are manufactured from 40Crv2 and offer a greater torque capacity and longevity when compared to the industry standard 50bv30 CrV.
LOK-ON™ Sockets will perform better, last longer, save time, reduce wear and replace the need for fastener extraction tools.

LOK·ON EVA Trays

EVA TRAY

All LOK-ON™ Socket Sets include Kincrome's industry leading and highest quality EVA foam trays. Custom designed for each set the EVA includes a hard shell surface with clearly marked sizing. CNC machined with precision accuracy, LOK-ON™ EVA trays ensure your investment is held securely and helps to effortlessly identify missing parts from your set.

LOK·ON Universal Joint

LOK-ON™ Universal Joints allow up-to 45° of smooth and controlled use compared to standard Universal Joint designs which can seize under large angle operation.
Offering maximum access and power transfer to the fastener, LOK-ON™ Universal Joints include a quick release button to secure the socket during use and detach easily after use.

Industrial Storage

LOK-ON™ Socket Set tins have been designed in Australia, pushing all manufacturing limitations to bring a unique style to an otherwise generic industry.
A distinctive footprint, the LOK-ON™ storage tins include dual-tone metallic powder coat finish, stainless steel riveted overlay, embossed branding & heavy duty latches.

LOK·ON Ratchet

LOK-ON™ Ratchets feature a 72 teeth gear system offering 5° of sweep (1/4" and 3/8" Drive). Independently tested, LOK-ON™ Ratchets have exceeded both break torque and lifetime tests of world leading brands and all international standards. Designed in Australia and engineered to Kincrome's highest standards, the LOK-ON™ Ratchets feature a fully forged body and triple injection handle for ergonomic use.

LOK·ON Extension Bar

LOK-ON™ Extension bars are designed to allow access in difficult work spaces. LOK-ON™ Extension bars include a quick release coupler to hold a socket or accessory secure and can be used as either a conventional straight bar or as a wobble bar providing 10° of movement. Also featuring hex nut ends which allows for the application of a wrench if additional torque is required.

LOK·ON Ratchet

LOK-ON™ Ratchets feature a 60 teeth gear system offering 6° of sweep (1/2" Drive). Independently tested, LOK-ON™ Ratchets have exceeded both break torque and lifetime tests of world leading brands and all international standards. Sockets Sets & Accessories

The Kincrome Socket Set Range is designed in Australia for the Trade Professional or Serious home user.

Sockets
Kincrome's range of sockets are manufactured from 50bv30 Chrome Vanadium Steel (Cr-V) and feature a Mirror Polish finish, colour coded metric and imperial rings for easy identification and Peripheral Drive technology. Peripheral Drive provides greater torque by relocating the load to the flat sides of a fastener, this allows for greater surface area contact and prevents "rounding off" of fasteners.

Ratchets
Kincrome ratchets feature a 72 teeth gear system offering 5 degrees of sweep allowing them to perform in the most restrictive of work spaces. Available in 1/4", 3/8" & 1/2" Drive. Independently tested, Kincrome ratchets exceed all international standards for both break torque and lifetime testing. Designed in Australia and engineered to Kincrome's highest standards, the Kincrome ratchets feature a fully forged one piece body for exceptional strength and ergonomics.

Extension Bars
Kincrome extension bars are designed to allow access in difficult work spaces. Kincrome extension bars can be used either as a conventional straight bar or as a wobble bar providing 15 degrees of movement.

Universal Joints
Kincrome universal joints are designed to work at extreme angles and in confined spaces to allow easy access to otherwise unreachable fasteners while continuing to offer maximum power transfer to the fastener.

Driver Bits
Kincrome Driver bits are manufactured from S2 industrial grade steel and have a chrome plated finish for superior corrosion protection. Each Kincrome bit is precision machined to ensure optimum fastener fitment and reduces wear and breakages of both the bits and the fasteners.

Storage
Kincrome socket set tins have been designed in Australia. Featuring a dual-tone gloss powder coat finish, heavy duty metal latches and housing the highest quality 2.0mm PVC trays. Each tray has clearly marked sizing for effortless identification.

50bv30 Cr-V
Chrome Vanadium (Cr-V) is a composite of many metallic elements and is superior in strength and durability to regular carbon steel. 50bv30 is the industry standard when it comes to professional grade tools and is used extensively across the Kincrome hand tool range. All Kincrome sockets are manufactured from 50bv30 to ensure the highest quality for the professional or home user.

- Unique Design Ratchet Handle with Quick Release
- Colour Coded Ring Sockets - (Metric Blue / Imperial Red)
- PVC Tray for Secure Tool Storage & Easy Tool Selection
- Metal Tin For Secure Tool Protection
- Socket Sets include a PVC tray for secure Tool Storage and a metal Tin for Tool protection

The push button quick release feature ensures that the socket is locked securely while in use, but also allows for easy removal or quick change of socket even with greasy or oily fingers.

PERIPHERAL DRIVE

Conventional sockets are made to the shape of the fastener and may break or 'round-off' edges when pressure is applied.
Kincrome sockets with Peripheral Drive provide greater torque by relocating the load to the stronger flat sides of the fastener and redistributing the pressure to stronger parts of the socket. This feature, combined with a greater surface area contact, improves torque and prevents 'rounding off' of the fastener.

KINCROME IMPACT SOCKET SETS

Make sure your workshop has the best quality tools - Kincrome's range of impact socket sets are durable, reliable, and get the job done every day. Our Impact Socket Sets come in imperial and metric measurements, as well as a variety of specialty measurements.

Kincrome's range of impact sockets are manufactured from Chrome Molybdenum (Cr-Mo) which is designed to hold up to the shock and vibrations that come from impact tools. Where normal sockets would fail and shatter, you can depend on Kincrome's Impact sockets.

They feature a black phosphate finish for superior corrosion protection, Ink Fill stamping for easy size identification and colour coded rings for unit of measurement visibility.

We have a full range of accessories to complement the sockets, including extension bars, uni joints & adaptors.

For durable tools you can rely on, explore our ranges and add Kincrome's Impact Sockets to your workshop.

SPANNERS & SPANNER SETS

TRUST TOUGH WITH

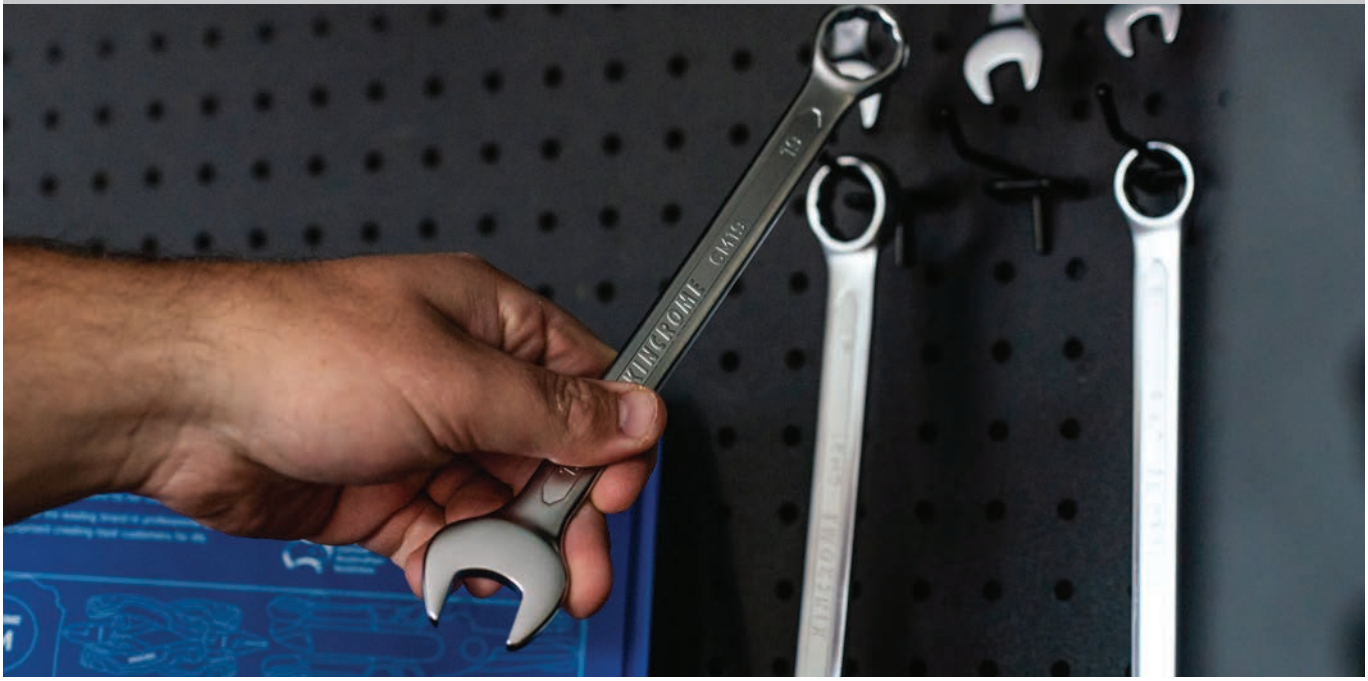
Kincrome's full range of spanners

Loosen or tighten nuts and bolts with ease and check out Kincrome's extensive range of spanner sets. Sets range from 7 to 47 pieces, so you'll be able to find a spanner set that works best for any job. These include combination, jumbo combination, flare nut, double ring, stubby and more.

The comprehensive range of Kincrome Spanners have undergone exhaustive independent testing and exceed Australian and international standards for strength and durability. Manufactured from Chrome Vanadium Steel and offering a lifetime guarantee, you can be sure these spanners won't let you down when you need them most.

The extensive range features sets ranging from 7 all the way up to 44 pieces, in a variety of spanner styles. Whether you're looking for Euro style, US style or stubby combination, double ring, tube or flare nut spanners, Kincrome has a spanner set to help you get the job done.

Satin Finish Spanners



Kincrome's range of European style, satin finish spanners have undergone exhaustive independent testing and are 80% and 130% stronger than the ASME and DIN standards respectively. They feature a thinner head allowing the spanner to reach tighter areas and a rounder shaft for a more comfortable grip, especially when under heavy load. Although they are lighter, being manufactured from premium quality Chrome Vanadium Steel (Cr-V) means that they are extremely strong and durable. The shorter length decreases radial movement by up to 20% making access easier in hard to reach places and the satin finish provides great corrosion resistance.

KINCROME

GEAR SPANNER RANGE

The Kincrome Gear Spanner has all the benefits of standard spanners and more

CrV STEEL | FINE TOOTH | PERIPHERAL DRIVE | LIFETIME GUARANTEE

Open End | Flex Head | Single Way | Reversible | Stubby Reversible

Kincrome gear spanners have all the benefits of standard spanners and more. The strong fine gear ratcheting ring end needs as little as 2.5° of sweep to move the fastener, a standard fixed ring end needs a minimum of 30°, or 12 times the area. Kincrome Gear Spanner ratcheting ring end has a Peripheral Drive™ configuration that virtually eliminates the rounding off of fasteners.

The market leading narrow and thin head, combined with fine gear tooth design makes the Kincrome gear spanner suitable for working in tight and hard to access areas where a ratchet and socket will not fit.

Most Gear Spanner Sets include a handy plastic storage case, ideal to store in a tool box or to carry to the job.

Riveters

LIFETIME GUARANTEE

Rivets are versatile fasteners designed for securely joining two materials together without the need for threaded connections. These rivets, also known as blind rivets, provide a convenient and efficient solution for a wide range of applications, including construction, automotive assembly, HVAC systems, and more.

Kincrome's wide riveter range features standard riveters, compact riveters, long armed riveters, drill accessory riveters, pivot head riveters, lazy-tong riveters and rivet packs.

Whether you're working with metal, plastic, or composite materials, standard rivets offer a cost-effective and efficient solution for securely fastening components together. Their simplicity and reliability make them a popular choice in industries where strong, non-threaded connections are required.

Merchandisers

Kincrome Merchandiser boards are based on a space saving, modular system which utilises every square centimetre of your display area to the maximum. Each board is 600mm in height and comes in widths of either 300mm, 600mm or 900mm. With multiple combinations, you can have a single board or link several together to make a stunning display.

Manufactured from heavy gauge steel, each board is Kincrome blue and powder coated for rust and scratch resistance. As well as the part number and description, each product has its silhouette printed on the board for easy recognition when the display needs to be restocked.

For 'easy set-up' and uniformity, with existing retail displays, standard pegboard hooks are used for each merchandiser.

LIFTING & MATERIALS HANDLING

SAFETY, INNOVATION & VALUE

The best lifting range in Australia

Three key components to the range of KINCROME Industrial lifting equipment.

Three key components we here at KINCROME, take very seriously.

KINCROME offers the best range of Australian Standards compliant, industrial quality lifting equipment, backed by the best industrial warranty and spare parts in the business. When your safety depends on it, depend on KINCROME for the peace of mind that comes from the most rigorous ongoing testing system in the country for lifting equipment. We don't just get a certificate and hope for the best, we go the extra mile, with 100% inspection and test on all jacks, stands and lifts.

We inspect every shipment at the factory with our accredited KINCROME QC inspection team members, not just third party inspectors doing random checks.

We also inspect again when the goods land at our dedicated engineering facility in Scoresby Melbourne to ensure all products exceed the Mandatory Australian Standards, plus any international standards that apply. That's why we can offer a two year trade warranty on all our Garage Jacks, jacks stands and many other items in our premium range.

KINCROME products look a little different to what else is out in the market as they are made differently, made to last. That's a choice KINCROME make to show the innovation you expect and performance you need.

We work with our manufacturers, to ensure we are adding as much safety and value as we can, to a very competitively priced piece of equipment. Where there is an opportunity to improve, we'll always strive to be the best, keep on improving and updating on what is already in our humble opinion, the best range of jacks available in Australia.

Bottle Jack Range

KINCROME have raised the bar with our range of industrial quality Bottle Jacks. Our exclusive design gives the user greater stability, optimum performance, unrivalled durability and features unseen on any other jacks of this nature.

The full welded construction ensures leak free operation and the convenience of the welded side handle on all models aids in the placement and removal of jacks under working conditions.

The precision machined billet steel bases, normally only found on large capacity jacks, are used exclusively on all models in the range.

The highest quality components and leak free welded design, KINCROME ensures quality and toughness, backing the whole range with a minimum 1 year Warranty.

Our Air/Hydraulic Bottle Jack's are specifically designed for the heavy transport industry, using only the finest components and include the peace of mind of a comprehensive 2 year warranty.

Self-Cut® Cable Tie Range

Kincrome Self-Cut cable ties are a new and innovative way to look at cable management. Each cable tie has a stainless steel blade that allows the user to remove the unwanted portion of the tie safely and without cutting tools.

This is a revolution for the industry as the 'no tools, just twist' feature, dramatically improves efficiency by enabling faster removal of the 'tail' of the tie with no tools, just a twist of the tail.

Safety is also improved with the in-built stainless blade removing the tail and leaving no sharp edges.

- Indoor use (Natural) indoor & outdoor use (Black) 22kg tensile strength
- RoHS compliant UV protection (Black)
- Save time during installation with a single twist and no additional cutting tool needed

POWER TOOL ACCESSORIES

LEAVES OTHER BITS IN PIECES

The Kincrome Power Tool Accessory range (PTA) has been specifically designed in Australia to suit both the professional and DIY user.

Our sets feature the most commonly used bits in a variety of different lengths ranging from 25mm up to 150mm. All sets come in an Australian designed metal tin and feature secure locking bit racks that are clearly marked for easy identification.

Kincrome PTA bits are manufactured from S2 steel and feature precision CNC machined magnetic tips, oversized torsion zones to improve bit performance and lifetime and our unique bit type colour coding system.

We offer a full range of accessories including Nutsetters, Socket Driver adaptors and Magnetic and Quick Release Magnetic bit couplers all in a variety of sizes from 50mm up to 150mm.

With specialty bulk packs and our Extreme Magnetic bit couplers, Kincrome has all professional or DIY users covered with one of the largest and most comprehensive ranges in the country.

Features:

Magnetic Quick Release

Quick release coupler provides quick change overs of driver bits. Simply push the knurled grip forward to eject the bit.

Magnetic C-Clip Coupler

Impact rated for high torque applications, the driver bit is retained with a magnet and a C-Clip and can be easily removed by hand for quick changes. Designed for 25mm driver bits.

Impact Performance

PTA is uniquely designed for extreme impact and torque applications. All bits are manufactured from S2 steel, machined and heat treated.

Torsion Control Zone

Absorbs extreme torque loads to optimise control whilst preventing fastener cam-out, extending the life of your impact bit.

Magnetic Precision Tip

CNC machined tips offer a precise fit to prevent stripping and fastener cam-out, magnetised for ultimate control.

Magnetic Lobular Head

Subtle cam in-hex design applies driving force to the flat surface of the fastener, preventing damage to its corners and a reduction in potential round-off.

Magnetic Extreme C-Clip Coupler

Impact rated for high torque applications, driver bit is retained with a magnet and our EXTREME strength C-Clip. Our coupler has been designed so the driver bit will NOT eject free when in use.

Socket Driver Adaptor

Available in 1/4", 3/8" and 1/2" Drive, the socket driver adapts a socket onto your 1/4" impact driver or standard drill driver. NOTE: If using an impact driver, you MUST use an impact rated socket.

WET & DRY VACCUM RANGE

Kincrome Wet and Dry Vacuum Range includes 20, 30, 50 and 80 litre size vacuums with motors ranging from 1250-1400W. The larger, industrial sized 80 litre vacuum has twin 1000W motors, that can be switched on/off individually depending on your needs.

The range includes tough stainless steel tanks, 1.5 to 2.5 metre flexible suction hoses (depending on model) for further reach and 5 metre power cables so you can move around with ease. The 20 and 30 litre include a blower port which is ideal for blowing, general cleaning, inflating mattresses and other inflatable products.

The 20, 30 and 50 litre vacuums include 2 stage filtration to remove as much dust and debris from the exhausted air during use. Both the 30 and 50 litre models also include an accessory power socket outlet for when using as a dust extractor with power tools. Ideal for workshops or on the work site, the range of wet and dry vacuums are designed to suit commercial, industrial and domestic requirements.
